Overview:
This document contains the steps required to prepare your workstation for iRIS.

More Information:
iRIS currently only supports Google Chrome, Mozilla Firefox, and Safari. Internet Explorer is currently not supported. You must install one of the supported browsers to use iRIS.

If you need any assistance with downloading/installing browsers or disabling pop-up blockers please contact the Help Center at 404-413-HELP(4357) or at help@gsu.edu.

Logging in for the First Time:
1. Login to iRIS by going to http://protocol.gsu.edu and logging in with your Campus ID and Campus ID password.

2. Upon logging in, you will be asked, “Would you like to try the iRIS Modern Theme”. Select “Yes”.

![Login to iRIS](image)
3. Next disable the pop up blocker for this site. Below are the steps for each supported browser.

**Disabling Pop-Up blocker in Google Chrome:**

1. Select the settings icon from Chrome and select “Settings”

2. Click “Show advance settings”

3. In the “Privacy” section, click “Content settings” button.

4. In the “Pop-ups” section, click “Manage exceptions”
5. At the bottom input https://[*.]gsu.imedris.net:443 and for behavior select “Allow”. Then click done.

Disabling Pop-Up blocker for Mozilla Firefox:

1. Select the “Firefox” button, then “Options”, then “Options” again.
2. Select “Content” and then next to “Block pop-up windows” select “Exceptions”.

3. In the “Address of website” field, input https://gsu.imedris.net and select “Allow”. Then select “Close”
Disabling Pop-Up blocker for Safari:

1. Select “Safari” from the top menu and then “Preferences”

2. Select “Security” and then uncheck the “Block pop-up windows” box.
